

## Conventional heat detector C50H

## Conventional heat detector

The C50 family of detectors are based on a new refined aesthetic that integrates the latest electronic technology with new, more efficient detection algorithms and a three-dimensional design that makes it more robust against environmental dirt.

The C50 family allows multiple combinations between smoke and heat detection.

The C50H model is a detector with a heat sensor.

The heat sensor allows the detector's thermovelocimetric response, reaching the alarm status with a static temperature of 60°C in the case of slow fire developments.

## Features:

- Heat sensor.
- Low profile, total height less than 42 mm (including low base).
- Also available with high base for 20 mm tube.
- Possibility of connection to a remote action indicator.
- Easy connection, without polarity.
- Red LED on to indicate its alarm status.
- Standby status signalled by simple flashing of the red led every 10 seconds.
- Easy installation of head and base, interchangeable throughout the C50 family, and made of white heatresistant ABS.
- Certified by AENOR according to Standard EN 54-5 class A2 with CE marking according to the European Regulation on Construction Products (EU) No. 305/2011.

| TECHNICAL FEATURES                  |                         |
|-------------------------------------|-------------------------|
| Power supply                        | 12-30V without polarity |
| Standby current                     | 35µA (at18V)            |
| Alarm current                       | 30mA (at 18V)           |
| Activation signal                   | Red light               |
| Remote indicator                    | Yes                     |
| Humidity                            | 20 - 95% RH             |
| Operative temperature               | -10°C - +50°C           |
| Storage temperature                 | -10°C - +55°C           |
| Sensitivity                         | EN 54-5 Class A2R       |
| IP protection                       | IP20                    |
| Coverage according with ISO 7240-14 | 5,1m (radius) / 50m²    |
